

Children's Spaces

Liberty Systems
LIBRARY FURNISHINGS

3 Bethesda Metro Center, Suite 700, Bethesda, MD 20814
800-487-6421 libertysystemsinc.com

What draws children in to any space? Bright colors, fun designs, of course toys and an overall inviting feeling. A welcoming children's area makes kids excited to use the library for more than just books. They enjoy playing with toys and interactive pieces they don't have at home. From using computers, to puppet shows, to trains or Lego tables, bringing education through play in a library space allows children to learn and prepare for the start of their educational careers. Remember, today's child patrons turn in to tomorrow's donors.

When we design a Children's Area, we use different pieces from different manufacturers shown in this brochure to build the environment and functionality unique to your library. This brochure has been compiled with products to represent some of what we offer, everything shown is available for purchase off of TIPS contract.

TMC
FURNITURE

When TMC Furniture hit the library furniture market, they hit it with some unique children's furniture. While they now have a strong foothold in adult furnishings as well, they are constantly reshaping and growing their children's lines, including the wildly popular parent/child carrel. From tables, seating, reading nooks, book bins, end panels, educational pieces and displays, they are a great place to start in our Children's brochure.

3branch's Discovery is a play table with an interchangeable top that can be Lego, Lego Duplo, train tracks, Tinker Toy and/or an LED Lightbox top. It comes in a full size, or a mini size and has built-in storage. It's a really great free play table option!

Fomcore manufactures high quality foam pieces that are durable, soft, bright and fun. Including reading nooks and sensory and safe pieces!

FomFilled
Beanbags &
Loungers

Nest Series

Sensory & Safe

Muzo offers a variety of mobile, folding and nesting tables that can easily be moved and stored to make space for story time or another activity. Replace the tables with the Donut or Fomcore's Lilly cushion for a fun, more comfortable floor seating.

Media Technologies has various forms of seating and storage with complementary tables that can be used to build function and fun in to any sized area.

Arcadia and ERG offer mainly children's seating that is aesthetically complementary to furniture design. Whether it's adding it to you existing furniture or using it in a new design, you can't go wrong with comfortable kids sized lounge chairs!

Smith System®
Smith System is known for their classroom furniture but they are a great budget friendly option for seating as well! Their storage solutions units can be used for STEM and STEAM times and rolled in to storage when the items are not in use!

Gressco is right in the manufacturer mix for children's tables, chairs and storage but they are a great place to find interactive pieces as well. Their kitchens, food trucks, boats, activity cubes & panels and display are all budget friendly and a great way to add something special in to you Children's Area.
