

Maker Space

3 Bethesda Metro Center, Suite 700, Bethesda, MD 20814

800-487-6421

libertysystemsinc.com

Other than 3D printers, sewing machines, plotters, and other supplies, a functioning Maker Space needs work benches, locking equipment storage and material storage. Having mobile pieces is ideal because it allows the tables to be pushed together or pulled apart depending on the project and group sizes. It also allows the staff to easily remove the equipment and supplies when the Maker Space is closed or the room is being used for another function.

Please keep in mind that the storage photos shown are just samples and most pieces can be ordered in any bin configuration and in various sizes.

Custom work areas can be created by grouping various pieces of furniture together.

Orbit Table - Various sizes.

Drift - Storage, various sizes & configurations

Carlo - Stool

Work+Box - Various sizes & bases.
Carlo Stool

Aurora's Times-2 product is essentially a lazy Susan with a double-face section of library shelving. It is fully enclosed and can be locked when it's closed. It can be set up in a block with a work surface like shown, in a row like standard shelving or as a single unit on casters which would allow it to be moved around, in or out of a room. It's another great option for storing equipment and materials.
