Teen and Young Adult areas of the library aren't just a place where our younger generation comes in to do homework, research and study. It is a place for them to plug in and maybe play video games or use wifi they might not have at home.

This brochure is a small collection of funky, eye catching, cool pieces of furniture this generation is attracted to. It's like the Field of Dreams, "If you build it they will come." If you create a great space, it will get used. These durable pieces are ready to be used, and we promise they will stand up to the abuse public furniture tends to receive.

Please keep in mind there are hundreds of different pieces of furniture in our repertoire and unfortunately it's not possible for us to put them all in this small brochure. If you don't see anything that makes you say "ohhhh", simply let our designers use their eye to take these blah product photos and turn them in to your refreshed Teen Space!
